

Cleaning Device for Concrete Work Pipe Socket

The application requires:

- no cleaning of the work-pipe-socket
- no concrete surface treatment after stripping the formwork

The application is:

- simple
- cost effective
- time-saving

Three steps to save money and time:

- Take off the concrete feeding hose
- Fix the cleaning device as shown in the picture
- Open the slide and press the concrete behind the formwork

Two types, suitable for the common work pipe sockets:

- SK100: for work pipe socket diameters of 100 mm
- SK120: for work pipe socket diameters of 125 mm
